Office Action Summary

Application No.

09/996,186

Applicant(s)

DI LELLE, JUAN PABLO

Examiner

Ryan R Yang

Art Unit

2672

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 5/25/2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 24-40 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 24-40 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

1. This action is responsive to communications: Amendment, filed on 5/25/2004.
This action is final.
2. Claims 24-40 are pending in this application. Claims 24 and 32 are independent claims.
3. This application claims foreign priority dated 4/19/2001.
4. The present title of the invention is "Generating three dimensional text" as filed originally.

Claim Rejections - 35 USC § 102

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
6. Claims 24-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Miller et al. (6,515,522).

As per claim 24, Miller et al., hereinafter Miller, discloses an apparatus for generating a live video broadcast in which new information to be broadcast develops during said broadcast and said new information is reflected in three dimensional text included with said broadcast, comprising:

video signal generation means for generating a live video signal ("The display data may include video data based on images of a video program in which titling effects are applied", column 4, line 1-2);

a text input device and text input receiving means for receiving input text from said text input device (Figure 1 22 User Input and 20 Graphical User Interface); a template storing means arranged to store a template of three dimensional preferences for input text (Figure 1 34 3-D Layout and Rendering Module "The three-dimensional layout and rendering module 34 uses the properties 36 and the alpha-numeric character string 26 to generate a set of polygons defining the characters", column 4, line 19-22, and "The processor generally manipulates the data within the integrated circuit memory and then copies the data to the disk after processing is completed", column 5, line 63-66, what is stored in the memory is a template);

text generating means for generating three dimensional text by formatting said input text in accordance with the three dimensional preferences of said template (Figure 1 34 3-D Layout and Rendering Module); and

combining means arranged to combine said three dimensional text with said live video signal to produce a broadcast signal (Figure 1 "'a character generator may be used in conjunction with, or independently from, a video editing system. A character generator receives alphanumeric character input from which image data is generated to be applied to the video data", column 3, line 48-52).

16. As per claim 32, Miller discloses a method for generating a live video broadcast wherein new information to be broadcast in three-dimensional text develops during said broadcast, the method comprising;

generating a live video signal ("The display data may include video data based on images of a video program in which titling effects are applied", column 4, line 1-2);

receiving input text from an input device (Figure 1 22 User Input and 20 Graphical User Interface);

reading a template of three-dimensional preferences for said input text (Figure 1 34 3-D Layout and Rendering Module “The three-dimensional layout and rendering module 34 uses the properties 36 and the alpha-numeric character string 26 to generate a set of polygons defining the characters”, column 4, line 19-22, and “The processor generally manipulates the data within the integrated circuit memory and then copies the data to the disk after processing is completed”, column 5, line 63-66, what is stored in the memory is a template);

generating three-dimensional text by formatting said input text in accordance with said three-dimensional preferences of said template (Figure 1 34 3-D Layout and Rendering Module); and

combing said three-dimensional text with said live video to produce a broadcast signal (Figure 1 “a character generator may be used in conjunction with, or independently from, a video editing system. A character generator receives alphanumeric character input from which image data is generated to be applied to the video data”, column 3, line 48-52).

9. As per claims 25 and 33, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, *supra*, respectively, and further discloses said text input device is a manually operable keyboard (Figure 1 22 User Input “A character generator receives alphanumeric character input from which image is generated to be applied to the video data”, column 3, line 50-52; “Example input devices

include a keyboard, keypad, track ball, mouse, pen and tablet, communication device, and data input device ...", column 5, line 13-15).

10. As per claims 26 and 34, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, supra, respectively, and further discloses said text input device is a real-time database (Since the data can be input from the keyboard in real time, it is a real time database).

11. As per claims 27 and 35, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, supra, respectively, and further discloses said three-dimensional preferences are defined by a movement or by a alpha-numeric input (Figure 12 "the text display area 160 is similar to a word processor ... A cursor 166 may be provided in this editor. The characters actually displayed in text display area 160 may be rendered using the three-dimensional techniques described above to provide a "what-you-see-is -what- you-get" (WYSIWYG) interface", column 14, line 37-45).

12. As per claims 28 and 36, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, supra, respectively, and further discloses said three-dimensional preferences specify a behaviour that takes place as text is added (Figure 13 "In this mode, the display area 168 displays the text, with three-dimensional rendering as it appears at a selected time in the effect with spatial effects, such as rolling or crawling applied", column 14, line 53-56).

13. As per claims 29 and 37, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, supra, respectively, and further discloses

said three-dimensional preferences specify a rotation in two-dimensions or in three-dimensions ("The alphanumeric character string is input to a three-dimensional layout and rendering module 34. A character may be associated with properties 36 defining characteristics of the character such as a font, rotation, position, size, kerning and lighting", column 4, line 15-20).

14. As per claims 30 and 38, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, supra, respectively, and further discloses said three-dimensional preferences define a scaling factor, an extrusion, a texture, or a light source, or any combination of the aforesaid preferences ("The alphanumeric character string is input to a three-dimensional layout and rendering module 34. A character may be associated with properties 36 defining characteristics of the character such as a font, rotation, position, size, kerning and lighting", column 4, line 15-20).

15. As per claims 31 and 39, Miller demonstrated all the elements as applied to the rejection of independent claims 24 and 32, supra, respectively, and further discloses said template storing means is arranged to store a plurality of available templates wherein one of said templates is selected for a particular application (Figure 2 12 and 13 where standstill state template and animation template provide a plurality of selections).

16. As per claim 40, Uesake demonstrated all the elements as applied to the rejection of independent claim 32, supra, and further discloses said preferences define the position of said three-dimensional text ("In order to display the contents of a text box, two functions are performed. First, the text is laid out in a plane or space defined by its parent node, by selecting position for each character based on the spatial

properties of the character ... A process for laying out characters along a path where the positions of the characters along the path affect their properties (in particular, size, orientation and other spatial properties) is described in more detail below in connection with FIG. 10. The characters are then drawn in their selected positions", column 10, line 17-31).

Response to Arguments

17. Applicant's arguments with respect to claims 24-40 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

18. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

19. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Inquiries

20. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Ryan Yang** whose telephone number is **(703) 308-6133**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Michael Razavi**, can be reached at **(703) 305-4713**.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 305-47000377.

Ryan Yang
